

# Niagara Child Care Centre Numeracy Project Training

June 5, 2010

## Participant Comments

What did you find to be most informative and meaningful?

# 1

- All of the examples given for all of the program planning activities and receiving the kit in French was the most meaningful.
- The opportunity to review the materials within the kits and share ideas on how to use the materials, in addition to the multitude of resources given to our centre.
- The manner in which the kits and training information provided were all tied together was most meaningful for me.

# 2

Did the training provide opportunities for you and your colleagues to brainstorm different ways of implementing the materials into your daily practice?

- Yes it was great to program plan with the staff that I work with daily.
- Yes, through setting specific goals during the program planning activity with the domains, just like we do on our own program plans.
- Yes, we were put into groups and given opportunities to discuss how we would use the various materials when designing activities for children.

# 3

Do you think that having access to the numeracy kit materials and training will increase your confidence in teaching young children early math concepts?

- Yes, the early math materials are there for us and the materials are all labelled within the various math concepts – Wow!
- Yes, the kit provided our program with a wide variety of different materials that can easily be adapted for all age levels targeting different domains.
- Yes, I don't have a math phobia (fear of teaching early math concepts to children) following the training session.

### Other Comments

- The committee did a super job putting together the materials in the kit.
- Love it! Merci pour la boîte en français.
- The Numeracy Trainer (Jennifer Havens) is awesome and adds humour, and she keeps us motivated.
- Everything was very well organized!
