

A is for Apple... E is for Easy

with the ECCDC's fresh crop of apple themed programming ideas.

eccdc

early childhood community development centre

Apple to Core Sequencing

Children may arrange the apple sequencing cards in order from apple to core to enhance their ability to create patterns using a variety of materials.

A Recipe of Apple Fun

Prepare the apple recipes with the children to enhance their observation, prediction and exploration skills. Complimentary activities are included.

Growing An Apple Tree Game

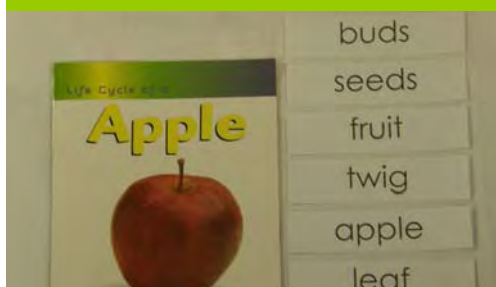

Invite children to count the apples and place them on the tree. This game will enhance children's understanding of numbers, help develop their counting skills and early math equation skills.

Sizing Up Apples

Encourage children to sort the apple bean bags into the baskets according to size. This activity will enhance children's classification, counting and seriating skills.

Life Cycle of An Apple Book

Develop children's listening skills, interest in reading and understanding of the life cycle of apples with this book. Have a discussion about parts of the apple and how apples grow.
